

# Be Green Sushi Trays

PACKAGING LLC

## with PET lids

These Sushi Trays are sturdy, unbleached, biodegradable trays made from bulrush (also known as cattails) and other plant fibers. The plant's rapid growth and annual renewability make it an ideal sustainable raw material, as it regenerates easily and abundantly. The plant fibers are made into rolls of paper, which are then pulped and molded into sushi trays and other take-out containers.

The Be Green Sushi Trays come in three sizes, with coordinating, anti-fog PET lids available separately.

### Sturdy, unbleached trays...

- made from annually renewable bulrush and other plant fibers.
- GMO-free
- BPI certified 100% compostable
- compostable in any compost environment
