

White Paper Soup Containers With PLA Lining and Compostable Lids

These heavy duty compostable and bio-based paper soup containers are the ultimate, Earth-friendly alternative for packaging hot or cold foods.

The environmental impact of Styrofoam and plastic containers may be well known, but often the poly lining of traditional paper soup containers is overlooked.

With these Earth-friendly containers that lining has been replaced with a compostable Ingeo biopolymer (PLA) lining. Made with FSC certified paperboard they are 100% compostable, as well as sustainable.

An efficient and inexpensive way to package anything from hot soups to frozen ice cream, they are sturdy, leakproof and microwave and freezer safe. A simple green band printed on them promotes their compostability and a low profile Ingeo lid (sold separately) give them a higher-end look than the standard paper soup containers.

Item #	Description	Inner Pack	Case Pack
453-25108	8oz White Paper Soup Container	20/50	1000
453-25112	12oz White Paper Soup Container	10/50	500
