The Fast-Casual Edition

Bowls, boxes and everything *that rides along.*

The bowl and the lid that fits it, clamshells and kraft boxes, sauce cups, cutlery and the bag it all goes out in.

31 product lines · 206 items · 83% compostable

(800) 317-2737 · www.excellentpackaging.com/catalog/fast-casual

INSIDE THIS EDITION

Fast casual is decided at the pass: does the lid snap on, does the sauce stay put, does the order survive twenty minutes in a delivery bag. This edition is built around that moment, starting with the bowl and working out to the bag.

Every bowl is shown with the lids that fit it, so you can see at a glance which pairs are fully compostable and which lids are PET. Add what you use to a quote list and we'll price it by the case for your volume.

Numbers are product lines. Every part number in this PDF links to its page online.

USING THIS EDITION

01

Find what you use

Chapters follow the way a kitchen like yours works. Each product line shows its sizes, case packs and the lids that fit.

02

Check the icons

Four rows tell you what it's made from, what it can hold, what else it offers and where it goes after. Exceptions are marked on the item.

03

Tap a part number

Every part number links to the item online, where you can add it to a quote list. A person at EPS prices it for your volume.

PRODUCT LINES	ITEMS	COMPOSTABLE
31	206	83%

QUICK-GLANCE ICONS

How to read the icons

Every product line carries the same four rows of icons as our printed catalog: what it's made from, what it can hold, what else it offers, and where it goes when you're done with it. Exceptions, like a lid that isn't compostable, are marked on the item itself.

WHAT IT'S MADE FROM

- **Ingeo PLA.** NatureWorks' Ingeo is made from renewable, domestically grown resources. It's carbon neutral and uses up to 68% less fossil fuel energy than traditional plastics.
- **Plant starch.** A biopolymer made from plant starch.
- **Natural fibers.** Annually renewable plant fibers and agricultural leftovers, including bagasse, bamboo, bulrush, sugarcane and wheat.
- **Wood fiber.** Wood and wood pulp harvested from sustainably managed forests.
- **Recycled content.** Made with recycled material. Where the catalog prints a percentage, it's shown beside the icon.

WHAT IT CAN HOLD

- **Hot foods.** Safe for hot foods and drinks.
- **Cold foods.** Safe for cold foods and drinks.
- **Microwave safe.** Can go in the microwave.
- **Freezer safe.** Can go in the freezer.

WHAT ELSE IT OFFERS

- **Custom print.** Can be printed with your logo. Minimums and colors are listed with each item.
- **BPI certified.** Certified compostable by the Biodegradable Products Institute.
- **GMO free.** Made without genetically modified materials.
- **Cradle to Cradle.** Assessed against the Cradle to Cradle standard for safety to people and the environment, and for how the product and its manufacturing are run.
- **Made in the USA.** Manufactured in the United States.
- **No added PFAS.** Made with no added PFAS (the catalog notes this for World Centric's fiber clamshells).

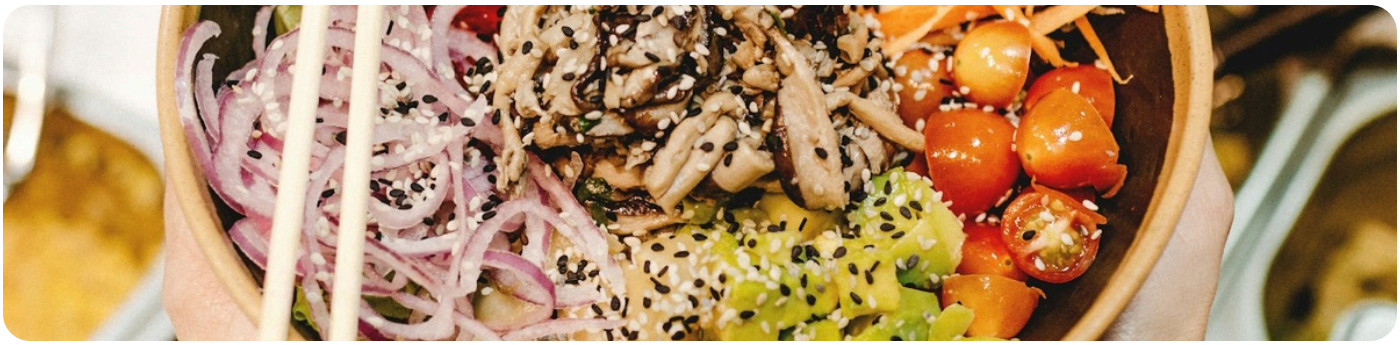

WHERE IT GOES AFTER

- **Home compostable.** Breaks down in a home compost bin.
- **Commercially compostable.** Breaks down in a commercial composting facility. Check with your city for a facility near you; not suited to a backyard bin.
- **Recyclable.** Goes in the recycling.

CHAPTER 01

Bowls

Burrito and rice bowls with vented lids, wheat straw and kraft bowls for warm food, clear PLA for salads.

BAGASSEWARE · CATALOG P. 16, 23

BagasseWare burrito bowls

Serve up everything from rice bowls and pasta to stuffed baked potatoes and, of course, burritos. White bowls with matching recyclable lids, or natural bowls with compostable PLA lids. Every lid is vented so what's inside stays fresh, not soggy.

MADE FROM

Natural fibers

HANDLES
