The Restaurant Edition

The dining room, the pass and *the to-go shelf.*

Takeout that travels the way it was plated, soup and sushi, tableware for the patio and events, and the back of house.

41 product lines · 211 items · 70% compostable

(800) 317-2737 · www.excellentpackaging.com/catalog/restaurant

INSIDE THIS EDITION

Most restaurants now run two services: the one in the dining room and the one that leaves in a bag. This edition is for the second, and for the corners of the first: patio plates, event tableware, and the line and dish pit that keep both going.

Containers sit beside the lids that fit them, and every item shows what it's made from and where it goes after, so you can choose with your city's rules and your guests in mind.

How to order

Numbers are product lines. Every part number in this PDF links to its page online.

USING THIS EDITION

01

Find what you use

Chapters follow the way a kitchen like yours works. Each product line shows its sizes, case packs and the lids that fit.

02

Check the icons

Four rows tell you what it's made from, what it can hold, what else it offers and where it goes after. Exceptions are marked on the item.

03

Tap a part number

Every part number links to the item online, where you can add it to a quote list. A person at EPS prices it for your volume.

PRODUCT LINES	ITEMS	COMPOSTABLE
41	211	70%

QUICK-GLANCE ICONS

How to read the icons

Every product line carries the same four rows of icons as our printed catalog: what it's made from, what it can hold, what else it offers, and where it goes when you're done with it. Exceptions, like a lid that isn't compostable, are marked on the item itself.

WHAT IT'S MADE FROM

- **Ingeo PLA.** NatureWorks' Ingeo is made from renewable, domestically grown resources. It's carbon neutral and uses up to 68% less fossil fuel energy than traditional plastics.
- **Plant starch.** A biopolymer made from plant starch.
- **Natural fibers.** Annually renewable plant fibers and agricultural leftovers, including bagasse, bamboo, bulrush, sugarcane and wheat.
- **Wood fiber.** Wood and wood pulp harvested from sustainably managed forests.
- **Recycled content.** Made with recycled material. Where the catalog prints a percentage, it's shown beside the icon.

WHAT IT CAN HOLD

- **Hot foods.** Safe for hot foods and drinks.
- **Cold foods.** Safe for cold foods and drinks.
- **Microwave safe.** Can go in the microwave.
- **Freezer safe.** Can go in the freezer.

WHAT ELSE IT OFFERS

- **Custom print.** Can be printed with your logo. Minimums and colors are listed with each item.
- **BPI certified.** Certified compostable by the Biodegradable Products Institute.
- **GMO free.** Made without genetically modified materials.
- **Cradle to Cradle.** Assessed against the Cradle to Cradle standard for safety to people and the environment, and for how the product and its manufacturing are run.
- **Made in the USA.** Manufactured in the United States.
- **No added PFAS.** Made with no added PFAS (the catalog notes this for World Centric's fiber clamshells).

WHERE IT GOES AFTER

- **Home compostable.** Breaks down in a home compost bin.
- **Commercially compostable.** Breaks down in a commercial composting facility. Check with your city for a facility near you; not suited to a backyard bin.
- **Recyclable.** Goes in the recycling.

CHAPTER 01

To go

Fiber clamshells that hold up to sauce, bulrush trays that go in a 425°F oven, and kraft bowls and boxes that look good opened at the table.

BAGASSEWARE · CATALOG P. 20

SPUDWARE · CATALOG P. 10

SpudWare compostable cutlery

Sleek, ridged and strong enough to handle anything you dish out. At 7 in it feels more like real flatware than most disposables, and the reinforced neck performs that way too. Fully compostable in a commercial facility.

MADE FROM: Plant starch

HANDLES: Hot foods, Cold foods

FEATURES: BPI certified, GMO free

GOES TO: Commercially compostable
